Projects

CodeMind – AI Second Brain for GitHub *MERN Stack · RAG · GitHub API*

- Built an AI-powered GitHub developer assistant that analyzes source code, repository architecture, Git history, pull requests and issues to provide context-aware repository insights.
- Engineered an intelligent RAG pipeline using AST-based code parsing, semantic embeddings, hybrid retrieval and MongoDB Vector Search for accurate code retrieval with file and line-level references.
- Developed code intelligence features including code explanation, request-flow tracing, dependency graphs, impact analysis and architecture visualization to understand how and why code is implemented.
- Integrated AI developer agents for debugging, PR review, security analysis, test generation and change planning with GitHub Webhooks, Redis/BullMQ and incremental repository indexing.

AI Memory OS – Personal Knowledge Platform *MERN Stack · RAG · Knowledge Graph*

- Built an AI-powered platform that remembers important information from conversations, documents and projects for personalized responses.
- Implemented RAG with embeddings and MongoDB Vector Search to retrieve relevant information and provide context-aware answers.
- Developed automatic memory management with memory extraction, updating, consolidation and conflict detection.
- Added knowledge graph, project-based memory, source references and AI-powered insights for organized personal knowledge.

Smart Placement Portal *MERN Stack · AI · Socket.io*

- Built a full-stack placement management platform connecting Students, TPOs, Alumni and Companies with dedicated dashboards for streamlined campus recruitment workflows.
- Implemented JWT-based authentication and role-based authorization with secure access control across student, company, TPO and alumni modules.
- Developed AI-powered features including an AI Chat Assistant, resume-based career support and mock interview workflows to help students prepare for placement opportunities.
- Engineered real-time communication and notification features using Socket.io, along with job applications, interview scheduling, alumni referrals and company recruitment management.

Technical Skills

Languages: C++, C, JavaScript (ES6+), HTML5, CSS3
Frontend: React.js, React Router
Backend: Node.js, Express.js, REST APIs, Socket.io
Database: MongoDB, MySQL
Cloud & APIs: Cloudinary API, WhatsApp Deep Link Integration
Tools: Git, GitHub, Postman, VS Code

Achievements

- Solved 150+ DSA problems on LeetCode covering Arrays, Strings, Linked Lists, Trees, BSTs, Graphs and Dynamic Programming.
- Strong understanding of algorithm design, recursion, searching, sorting and time-space complexity.
- Built multiple production-scale MERN applications with authentication, cloud storage, real-time communication and analytics.
- Consistently practice coding interview problems and competitive programming.

Education

Jaypee University of Engineering and Technology, Guna *Aug 2023 – May 2027*
Bachelor of Technology in Computer Science and Engineering

Relevant Coursework

Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Computer Networks, Operating Systems, Software Engineering, Deep Learning
